

SINGLE PHASE PUMP CONTROL PANEL

KELTRON presents a newly designed **Single phase pump Control Panel**, engineered to deliver efficient and reliable control of **Single phase Open-well Pump** systems. This new product is for controlling the water pumps in open well and contains motor start capacitor circuitry. The newly designed water pump control panel box ensures efficient control of pump operations with enhanced safety features. It is compact, user friendly, and suitable for single phase open well pump systems.

Product Specifications

Specification	Details
Product Type	Single-Phase Control Panel For Open-Well Pumpset
Model	AQUA- B Series
Voltage	240 VAC/50 Hz
Product Range	For 0.5 HP to 5 HP Pumps
MCB Rating	16 Amp to 32 Amp
Running Capacitor	25 μ F to 72 μ F
Application	For Household Purpose, Commercial Building, Farms etc...
Brand	KELTRON
Weight	0.5 kg

India's First and Largest State
